

ERA

WIRE INC.

We give it to you straight.

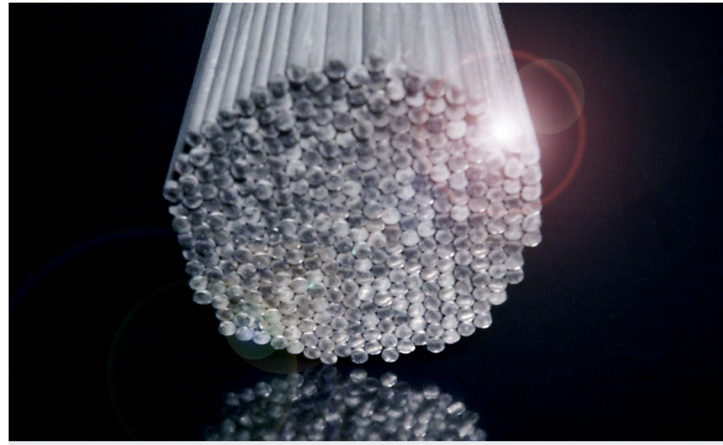

ERA WIRE, INC.

More than just wire...

ERA Wire, Inc. was founded as a part-time venture in 1988 by Richard T. Rae, Sr. whose background included design, engineering and manufacturing in the wire machinery industry. By 1990, the company was established as a full-time operation. One year later, Richard T. Rae, Jr. came on board to help meet the ever increasing demands of the company's services.

Today, Richard, Jr. is committed to carrying on his father's legacy. He, along with the company's expanded work force, are truly "wired" into the continued success of ERA Wire, Inc. An unwavering commitment to their customers' needs is fueled by the special dedication to provide not only quality of work but the utmost in customer service. Even the name ERA Wire is derived from the Rae family name... a name and a company intertwined with pride of ownership and a good old-fashioned work ethic. That's the "reel" story of ERA Wire...

"We give it to you straight".

Used Wire Machinery Sales

We offer OEM Warranty for six months on all rebuilt machinery. Tooling for one complete set-up is included on all machinery sales (customer to specify). For a complete list of our Wire Machinery available for purchase or to get a Free on-line quote, call: (203) 933-0480 or visit us at: www.erawire.com
